Specialities

DIG IT provides a wide range of professional civil services: -

- Asbestos removal
- Demolition
- Detail and bulk excavation
- Equipment hire
- Piling
- Rock sawing / breaking
- Landscaping and gardening
- Site remediation and contaminated soil
- Site preparation, levelling and compaction, clearing, cutting and filling
- Tree and vegetation clearing
- Hammering and pulverizing of sandstone, rock and concrete
- Construction of retaining walls, footings and foundations
- Drainage and trenching for builders, plumbers and electricians
- Screening, crushing and recycling of materials
- Vacuum excavation for pot holing and service trenches

We specialise in difficult sites and all those hard to reach places which have become bogged down or snowed under: -

- Demolition of houses and buildings with restricted access
- Pool excavation / demolition / filling in unwanted pools
- Removal of slabs, driveways and paths
- Sites with narrow and confined spaces
- Tight, tricky access under buildings
- Driveways and roads
- Tennis court preparation
- Horse dressage arena preparation and construction
- Retention tanks and dams

Our Services

Bulk & Detailed Civil Excavation

We specialise in bulk and detailed excavation on a multitude of construction sites. We are exceptionally experienced in sites with limited access or tight surrounds. Our extensive fleet of modern machinery is compact with zero swing, meaning none of them have a large counterweight overhanging at the rear, hence they can fit into tight, confined spaces.

Our team can manage every aspect of the excavation process, including clearing land, excavating rock and managing bulk earthworks and landfill in preparation for construction.

We offer bulk excavation services that involve removing, moving or adding large quantities of soil or rock from a particular location to another. We also manage detailed excavation such as building foundations and footings.

Demolition & Asbestos Removal

DIG IT is a specialist demolition contractor, licensed to remove asbestos and other hazardous materials. We carry out all aspects of demolition: -

- Garages, sheds and driveways
- Residential houses
- Commercial buildings
- Industrial sites and warehouses
- Concrete and fibreglass swimming pools, including filling in the space or removing the pool
- Landscaping and retaining walls
- Trees and vegetation

As it is difficult to identify asbestos products just by looking at them, it is important to hire a licensed professional to identify, handle and remove asbestos products from your residential or commercial property. DIG IT Civil is authorised by WorkCover to conduct asbestos removal during construction projects.

Landscaping & Civil Works

DIG IT specialises in demolition, remediation, excavation and earth moving of all civil construction projects. Our civil construction services include: -

*Roads and curbs | Railways | Water reservoirs | Airports | Tunnels & Bridges
Sewer systems | Subdivision preparation and utility infrastructure | Dams*

Our team of qualified experts have a wealth of experience in civil construction and landscaping projects, from residential gardens to parks, playgrounds, car parks and access roads. We work with universities, councils, hospitals, estates, government departments and property developers in Sydney to create safe and functional environments for the local community.

Piling

DIG IT has highly skilled, experienced and confident piling contractors offering concrete, bored, shoring and screw piling services.

We recognise piling is an essential part of any construction project as it provides the crucial support and foundation needed to uphold any building. It is especially important when deep excavation is undertaken in the close proximity of neighbouring buildings or the foundation ground is not suitable to support the structure alone.

We will undertake a thorough assessment prior to starting any project; assessing soil conditions and depth, depth and diameter of holes required and underlying rock type.

The pilings DIG IT specialises in: -

- Contiguous piles & secant
- CFA piles
- Capping beams
- Shotcreting
- Anchoring & walers

We also have extensive experience in other types of piling and civil works such as bored piling, sheet piling, screw piling, driven piling, micro/mini piling and pile testing.

Rock Sawing, Hammers and Grinders

DIG IT has an extensive range of rock saws, hammers and grinders to suit your project needs.

Rock saws deliver an efficient, accurate solution to excavate rock for structural foundations built on challenging materials. They have low noise levels and reduced vibration making them ideal for demolition projects that require minimal noise from council. They are recommended for projects in older style properties and sensitive environments.

Our range of hammers are a great solution for breaking through rock and concrete quickly and precisely. Applications include: -

- Demolition of buildings, concrete slabs and foundations
- Construction projects
- Hard-rock bulk and detailed excavation

Our range of rock grinders cut through challenging materials with ease and offer a naturally weathered appearance to freshly excavated rock. Rock grinders are ideal for tight access areas, sensitive sites, digging service trenches and cutting through hard rock with precision.

Pool Excavation

DIG IT is proficient in excavating spaces for concrete and fibreglass swimming pools, ponds, lap pools, splash pools and spas in both residential and commercial properties.

Our expert team of qualified staff will manage your project from initial site inspection and project run-through to completion and removal/clean-up of the project. Your project will be completed with minimal stress upon your household.

We specialise in small, tight and awkward to access spaces. Our equipment is specialty built to allow us to enter the tightest of spaces, so we can access your pool area with minimal impact on your property.

Plant and Equipment Hire

DIG IT's ability to provide wet hire with a vast selection of plant and equipment, enables us to complete just about any earthmoving project.

We have dedicated and competent crew ready to fulfil your requirements in a cost effective and efficient manner. Our trucks and machines are exceptionally reliable, which will ensure the plant and equipment requested will arrive on site, on time and at the best price.

Our vast array of plant and equipment for hire includes:

Excavators

3 x 1.7 tonne
3 x 3.5 tonne
4 x 5.5 tonne
1 x 8 tonne
3 x 14 tonne
1 x 23 tonne

Posi Tracks

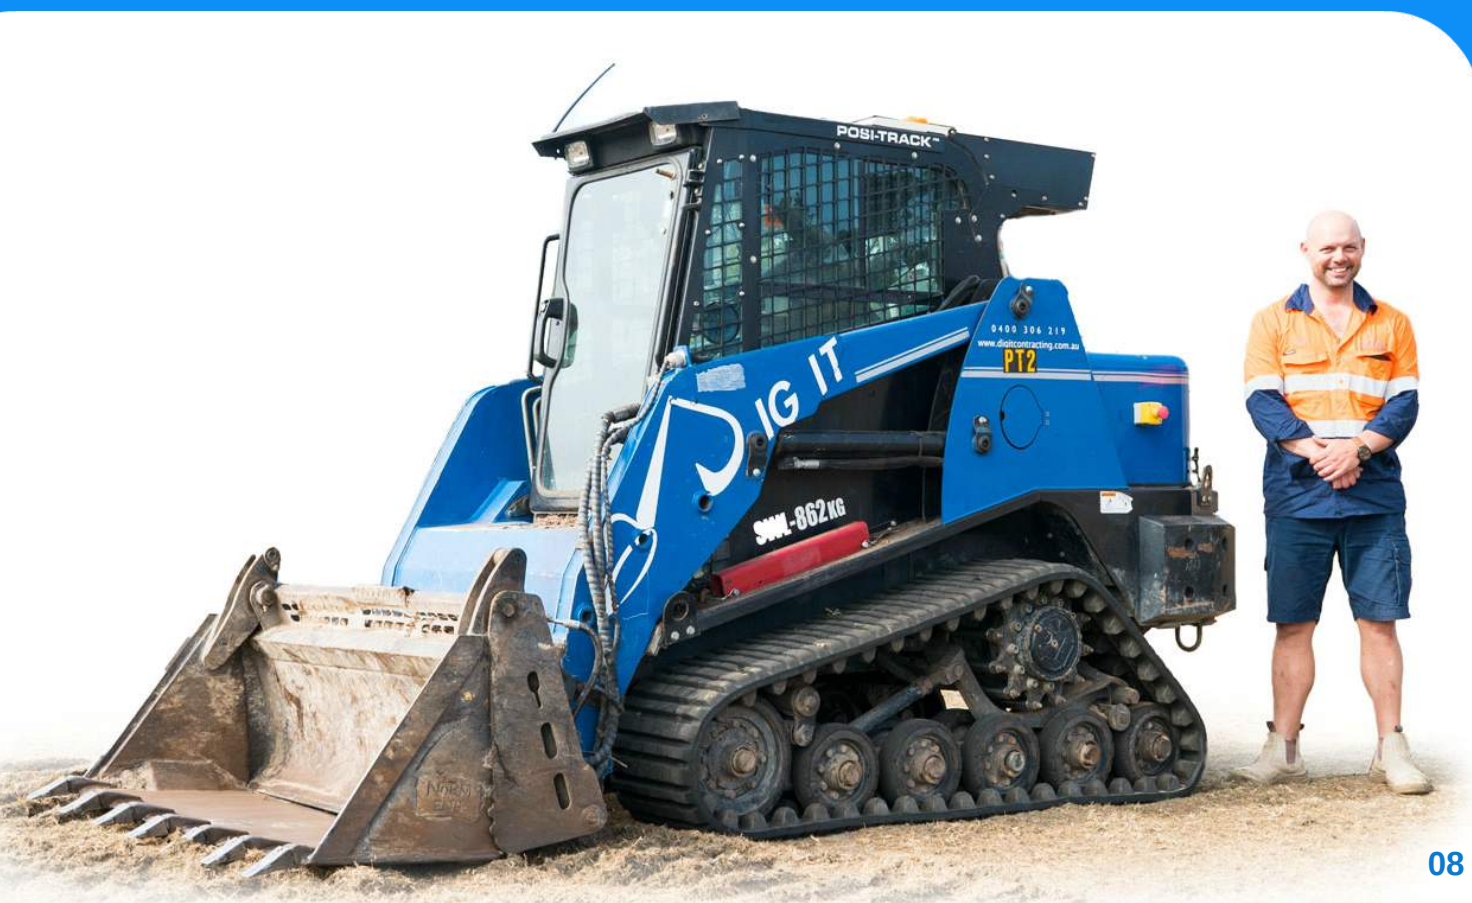

1 x PT 30
1 x PT 60
1 x PT 100

Trucks

1 x 5.5 tonne tipper
1 x 6 tonne tipper
1 x 8 tonne tipper
1 x Bogie tipper
2 x truck & dog tippers

Attachments available for all excavators include, buckets & rippers, grabs & sifting buckets, hammers & augers, lifting chains and slings, rock saw diamond.

Attachments available for all posi tracks include, buckets 4-in-1, chain trenchers, pallet forks and sweepers / brooms.

Selected Clients

DIG IT highly values the quality of its commercial affiliations. These include such quality companies as:

Growthbuilt | Richard Crookes Construction | Beebo Constructions | Lahey Constructions | Patterson Building Group | Trico Constructions | Agia Constructions | Belvedere Constructions | Horizon Habitats | Midson Construction | Belvedere Projects | Crystal Pools | Jarvis Constructions | Burmah Constructions | Artesian Pools | GNC Quality | Brianda Projects

Recent Projects

Hastings Parade, North Bondi

Client: HSN Construction

Description: Demolish residential house, bulk excavation, excavation of council verge and footpath in rock 1200m³

Value: \$315,000

Small Street, Woollahra

Client: RCCI

Description: Demolish residential house, excavation 1450m³, piling, walers, steel bracing

Value: \$580,000

McHatten Street, Waverton

Client: Beebo Constructions

Description: Tennis court demolition, piling of 1300lm, waler and raking structs, bulk and detailed excavation, shotcrete

Value: \$715,000

Blandford Avenue, Bronte

Client: Orisi Project

Description: Demolition of a residential house, piling 1400Lm, shotcrete & excavation 1300m³

Value: \$900,000

O'Connor St, Chippendale

Client: Belvedere Constructions

Description: Principle contractor for site establishment, trade assistance for site retention and shoring, bulk and detailed excavation. Piling, wailer and anchors, removal of 7000m³ of sand and rock.

Value: \$1,700,000

Our Story

In 2007, Scott Remond established DIG IT with a single excavator and tipper truck to service Sydney's Eastern Suburbs. Today, our fleet includes a wide range of excavators, tipper trucks, bobcats, boggie tippers, skid steers and several specialty attachments.

Our services have extended beyond the Eastern Suburbs and now encapsulate the wider metropolitan and coastal regions.

Scott's interest and involvement in earth-moving stems from his earlier experience working as a lead hand on a rural property in north-western New South Wales.

Scott's upbringing and strong family ties have shaped the core values of DIG IT, which include; integrity, balance and gratitude. It is from the honest, reliable and quality work ethic demonstrated by Scott and his team that DIG IT has earned its highly respected and sought after reputation in Sydney's construction / building industry.

Our Mission

To become the number one recommended company for civil excavation and demolition services. We will achieve this by providing our experienced staff and reliable machines 24hours a day, anytime and anywhere throughout the Sydney metropolitan and Central Coast regions. Our quality services will be delivered in the most efficient and professional manner to ensure that our clients feel satisfied and valued.

Our Culture

Here at DIG IT, we are committed to the vision, mission and success of the company and to that end, have strong key values that shape the way we work. These are: -

Why choose DIG IT?

Personal Approach

We listen to our clients and assist them with making informed decisions in order to ensure that our projects match their vision, budgets and timeframes.

Flexibility

We are available 24-hours, providing services to clients at any time of the day and night and in any location within the wider Sydney and Central Coast region.

Competitive Rates

We offer a free quote/no obligation inspection for each and every project and will provide an accurate account of expected costs.

Extensive Scope

The DIG IT team includes a large fleet of machinery and attachments which enables us to complete an extensive range of projects including; demolition and asbestos removal, bulk and detailed excavation, landscaping and civil works, piling, rock sawing, pool excavation, site-remediation and transportation of materials.

Experience

Employees of DIG IT have a wealth of knowledge and experience and are committed to ongoing education, certifications and licencing. Many of our key employees, both on site and in the management team, have been with the company since it commenced operations in 2007.

Company Growth

Over the past decade, DIG IT has grown significantly. This is largely due to diversification into specialty works, offering both hire and contract of our services and the purchase of unique attachments.

Major reviews of Australia's financial system, tax system, work place relations framework and competition policy are underway. DIG IT has proven resilient in its market strategy. We are proud to have grown, overcoming the challenges faced. Profits have been put back into the business, purchasing the latest plant equipment. This has lead to extending the technical capabilities of the staff.

DIG IT commenced as a three-man team. Today, 30 extremely qualified managers and dedicated and skilled personnel are employed across the office, storage yard and numerous work sites.

Skill Development

We recognise that employees who are given effective training opportunities are more satisfied with their jobs. Our workforce is trained to the highest standard and we continue to invest to further develop our employees' capabilities. This includes Work Health and Safety (WHS), environmental awareness, and specific tuition to increase particular skill sets.

DIG IT ensures that all personnel have the necessary qualifications to comply with Work Cover regulations governing specialised activities such as working in confined spaces and plant operation.

Quality

All DIG IT employees conduct their work in a professional and efficient manner so our clients receive the best service and value for money. We have earned our reputation in the highly competitive construction and demolition industry by delivering first class projects.

Work Health and Safety

DIG IT ensures that our services are provided in a safe manner by suitably trained personnel. To continually improve our safety procedures, policies and processes, DIG IT provides training and induction to all employees as well as regular internal reviews.

Furthermore, DIG IT only provides plant and equipment that is safe and properly maintained. Upon request we can provide Work Cover Licences which are part of our WHS System. We ensure all requirements of the WHS Regulation 2001 are applied.

Providing a safe and healthy work environment for employees and sub-contractors is one of our primary priorities.

Integrated Management System

DIG IT's integrated management system allows us to integrate and organise all of the company's systems and processes into one complete framework. This allows DIG IT to operate as a single unit with unified objectives. It covers all aspects of our operations. It is designed to help us meet our quality, safety and environmental goals and legal obligations.

Community

DIG IT is committed to supporting the local communities in which we work. On every project we work closely with our client and community stakeholders to minimise the impact of our works and ultimately, to help build better communities.

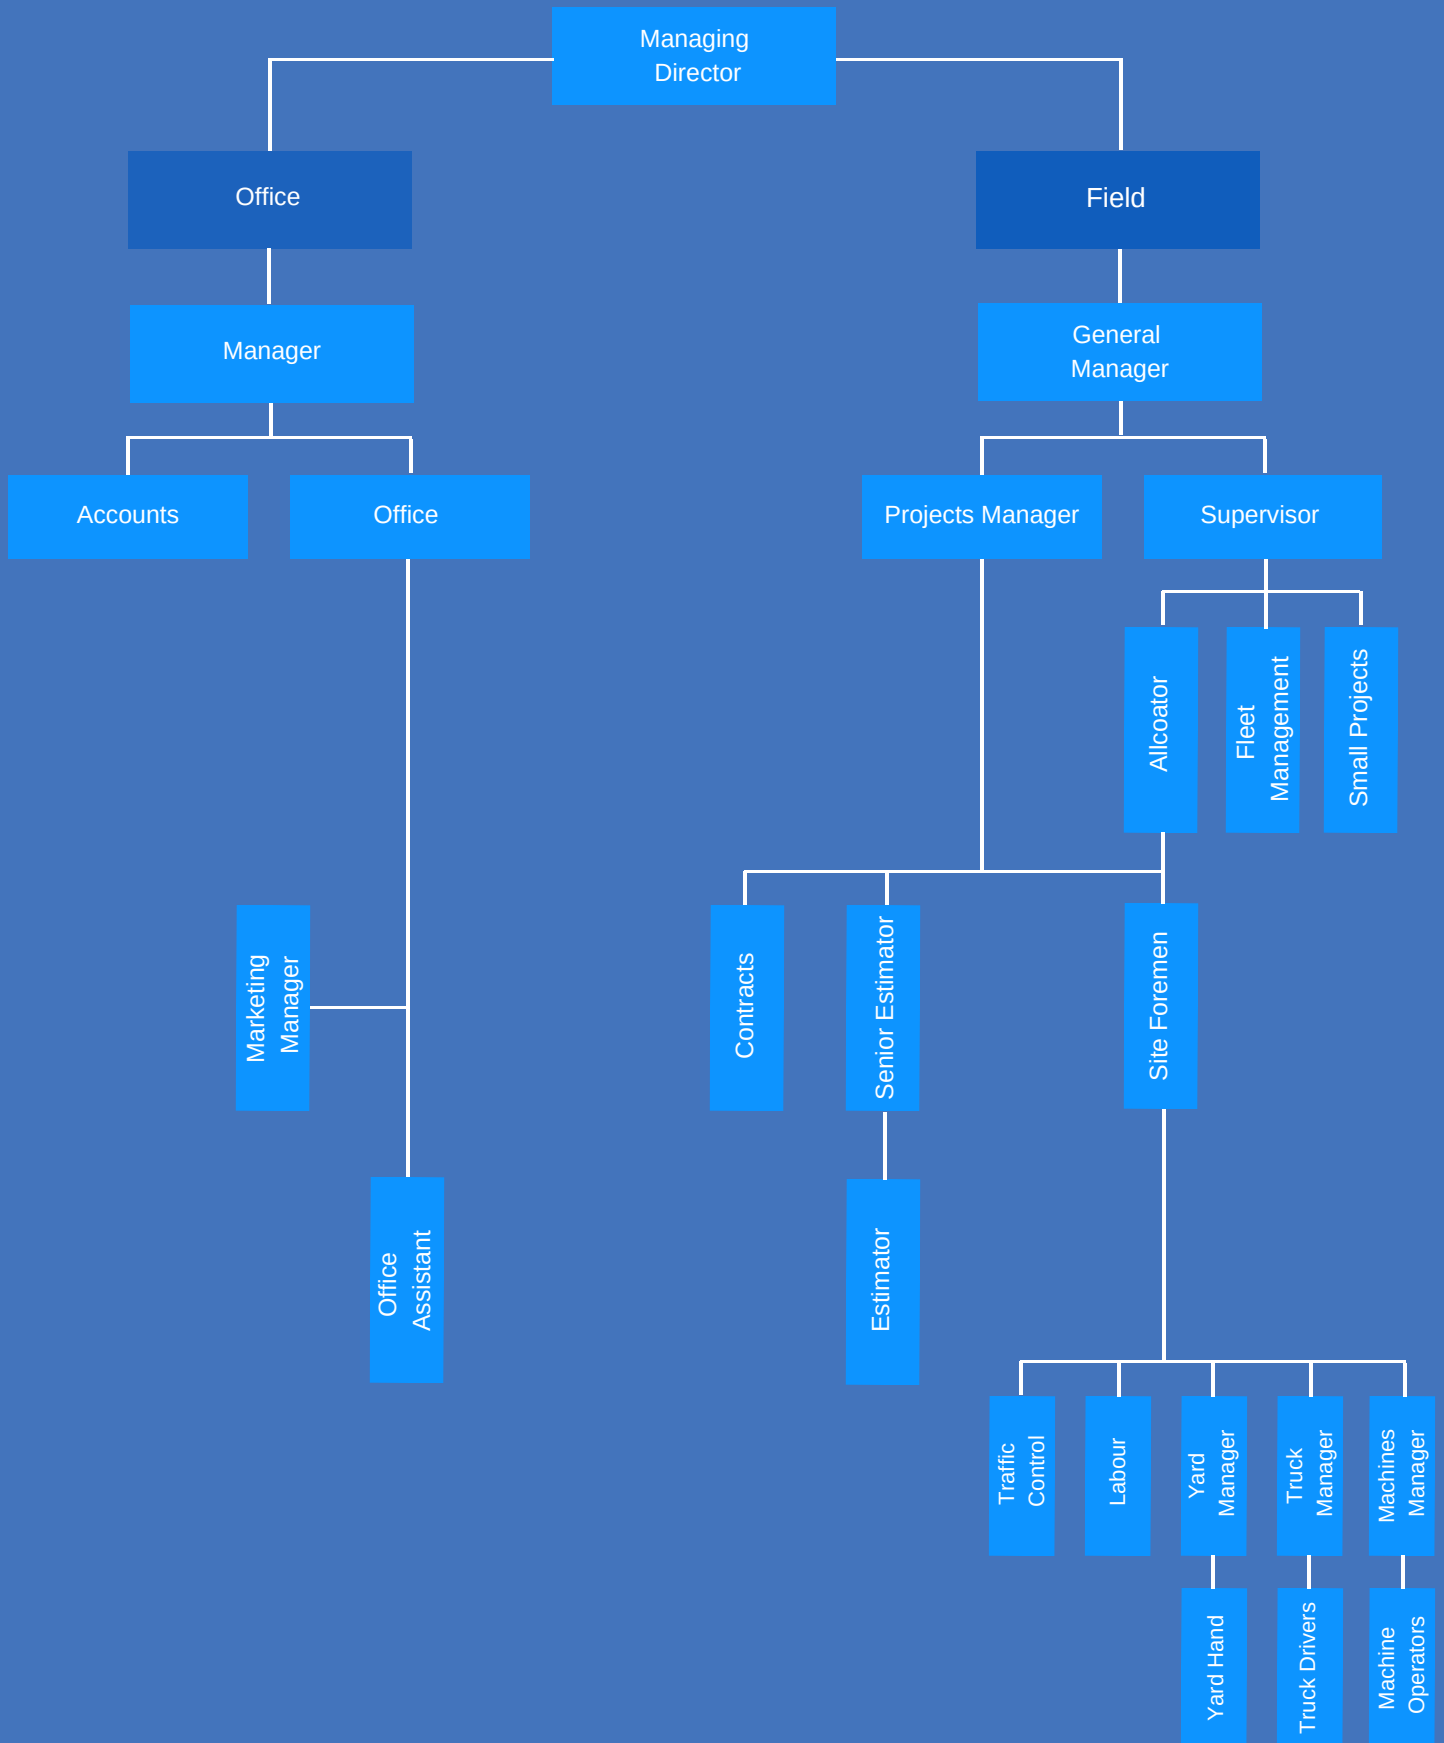

Environment

DIG IT has a proven Environmental Management System (EMS) to ensure our work practices minimise (as much as possible) any negative effects on the environment. The system takes an integrated approach, ensuring we have multiple methods and tools at our disposal.

We continually assess and monitor our environmental processes to enable improvement, ranging from erosion and sedimentation control methods to habitat protection. Practices are analysed and adapted to meet site-specific parameters, ensuring that we deliver the best possible solution.
