

Dig It Civil Pty Ltd

Company Profile

DIG IT's Vision

To be the first choice for civil construction, excavation and plant hire in the Sydney Metropolitan and Central Coast regions.

DIG IT's Mission

DIG IT's mission is to become the number one recommended company for civil excavation, demolition and plant and equipment hire services. We will achieve this by providing experienced staff and reliable machines 24-hours a day, anytime and anywhere in the Sydney Metropolitan and Central Coast regions. Our quality services will be delivered in an efficient and professional manner to ensure that our clients feel satisfied and valued.

Company History

In 2007, Scott Remond established DIG IT with a single excavator and tipper truck to service Sydney's Eastern Suburbs. Today, our fleet includes a whole variety of excavators, tipper trucks, bobcats, boggie tippers as well as skid steers and several specialty attachments.

Our services have extended beyond the Eastern Suburbs and now encapsulate the wider Sydney metropolitan and Central Coast regions.

Scott's keen interest and involvement in earthmoving stems from his earlier experience working as a lead hand on a rural property in north-western New South Wales.

Scott's upbringing and strong family ties have shaped the core values of DIG IT, which include; integrity, balance and gratitude. It is from the honest, reliable and quality work ethic demonstrated by Scott and his team that DIG IT has earned its highly respected and sought-after reputation in Sydney's Construction/Building Industry.

Points of Culture

Commitment

DIG IT is committed to the vision, mission and success of the company and values its trusted relationships with all of its clients, current and future. We take pride in our interactions and work performance, as well as being committed to personal growth and prosperity.

Integrity

We treat everyone respectfully and in a dignified fashion, with open and honest communication. Our relationships with clients are important to us and we are committed to delivering on each and every agreement we enter into.

Excellence

We strive to deliver services that are of exceptional quality to benefit all persons involved. We hope to exceed expectations through the company's ongoing performance, evaluation and improvements.

Balance

We hold a balanced approach to work and play, valuing the importance of family and friends as well as spiritual, social and physical well-being. We emphasise the needs of our employees in tandem with the industrial and financial pursuits of our business.

Team work

We recognise the strength of mutual goals and achievement, and promote cooperation and resolution within our workforce.

Flexibility

We are flexible in our delivery of services in order to best suit the wishes of each individual client. Furthermore, we are able to mobilise employees and machines quickly across various projects and locations.

Communication

We always listen to our clients' requests and concerns, acknowledging the trust clients place in us. We speak openly and positively about our team members and all clients both in public and private settings; however we also recognise the importance of confidentiality.

Solution focussed

We strive to overcome obstacles through being resourceful and innovative. We recognise and take responsibility for our mistakes to ensure that our clients receive the best results. Risks will be managed collaboratively in order to benefit both clients and the company.

Safety

We are dedicated to offering high-quality, safe, healthy and sustainable operations for our clients. The safety of our clients, team members, associates and the protection of the environment is paramount to our company's ethic and services.

**"COMMITTED TO
HEALTH & SAFETY"**

**SAFETY
FIRST**

Gratitude

We are grateful for the clients we work for and greatly appreciate the opportunity to make improvements to their lives, and to demonstrate our skills. We view satisfied clients as victories for our team and celebrate the successes together.

Why choose Dig It?

Personal Approach

We listen to our clients and assist them with making informed decisions in order to ensure that our projects match their personal wishes, budgets and time frames.

Flexibility

DIG IT's services are available 24-hours, therefore providing services to clients at any time of day and night and in any location within the wider Sydney and Central Coast region.

Our services can be tailored to suit your plans as we can be contracted or hired by the hour, day, or truck load.

Competitive Rates

We offer a free quote/no obligation inspection for each and every project. Furthermore, we will provide you with an accurate account of expected costs so that you can make informed decisions without any expenses. We believe our rates are competitive and subsequently publish them openly on our website.

Extensive Scope

The DIG IT team includes a large fleet of machinery and attachments which enables us to complete an extensive range of projects, including; all demolition, bulk and detailed excavations, civil construction and landscaping, shoring and underpinning works, removal, site-remediation and transportation of materials.

Experience

Employees of DIG IT have a wealth of knowledge and experience, and are committed to ongoing education, certifications and licencing. Many of our key employees, both on site and in the management team, have been with the company since it commenced operations in 2007.

Specialities

DIG IT offers a wide range of expertise in site remediation, demolition, excavation and construction.

DIG IT specialises in difficult sites and all those hard to reach places which have become bogged down or snowed under. They include:

- Detail and bulk excavation
- Landscaping and gardening
- Demolition of houses and buildings
- Rubbish removal
- Pool excavation / demolition
- Digging foundations, footings and trenches
- Rock sawing / breaking
- Removal of slabs, driveways and paths
- Site levelling, tree and vegetation clearing
- Remediation and contaminated soil
- All terrain machines for wet / sandy sites
- Tight, tricky access / under buildings
- Specialising in difficult sites with narrow and confined spaces
- Site remediation and consulting services
- Site preparation, levelling, clearing, cutting and filling
- Augers for piers and shoring
- Hammering and pulverizing of sandstone, rock and concrete
- Retention tanks and dams
- Driveways and roads
- Tennis court preparation
- Horse dressage arena preparation and construction
- Drainage and trenching for builders, plumbers and electricians
- Construction of retaining walls, footings and foundations
- Screening, crushing and recycling of materials
- Levelling and compaction
- Landscaping and gardening works
- Landfill and clean compactable fill available / delivered
- Swimming pool excavation and filling in unwanted pools
- Vacuum excavation for pot holing and service trenches

Services

Civil, Bulk and Detailed Excavation

DIG IT specialises in excavating construction sites throughout Sydney Metropolitan and Central Coast regions. Our fleet of modern machines, including a truck and dog trailer combination, is capable of carrying up to 30 tonnes per load, so together we can complete the project on time and within budget.

Our qualified and experienced team can manage every aspect of the excavation process, including clearing land, excavating rock and managing bulk earthworks and landfill in preparation for construction. We offer bulk excavation services that involve removing, moving or adding large quantities of soil or rock from a particular location to another.

Our team, in collaboration with industry experts, will ensure that all underground utilities are located and disconnected before any works begin. Detailed excavation will be completed safely around utilities, drainage and electrical services, in line with applicable regulations.

With the use of the Diamond Saw attachment, rock hammers and bucket, we can provide levelling, final trimming and detailed excavations for trenches, piers, beams, and footings.

Civil Construction and Landscaping

Our team of qualified experts have a wealth of experience in civil construction and landscaping projects, from residential gardens to parks, playgrounds, car parks and access roads. We work with universities, councils, hospitals, estates, government departments and property developers in Sydney to create safe and functional environments for vehicles, pedestrians and the local community. Our range of services also includes excavations for outdoor kitchens, concrete and gravel driveways and walkways, patios, retaining walls, pool surrounds and water features, fire pits and outdoor fireplaces.

DIG IT manages all aspects of the design, construction and maintenance of natural and built environments. This includes demolition, remediation, excavation and earthmoving services as well as equipment and machinery hire. We also provide landscaping products including aggregates for drainage, erosion control products, decorative gravel and pebbles, mulch, sand, oil, garden mixes and turf.

Pool Excavation

DIG IT offers excavations for driveways, tennis courts, dressage arenas and a range of other applications, however, our speciality is excavating sites for the installation of swimming pools.

We have many years experience excavating spaces for concrete and fibreglass swimming pools in residential and commercial properties. We also offer excavation services for ponds, lap pools, splash pools and spas.

We are able to tailor our equipment to your individual needs by up-scaling or downsizing according to the space available. For limited space and tighter access we have mini-excavators, wheel-barrows and conveyers to remove material from the site, leaving minimal impact on the property.

If you are replacing your swimming pool, we demolish the old pool while cutting the shape for the new one, to help you save time and stay on budget. With a range of modern trucks and equipment available, we remove all soil and waste materials from the site and transport it to a waste facility.

Demolition

DIG IT offers all aspects of demolition contracting, from small residential houses to larger commercial buildings and sites. Our equipment includes; excavators, trucks, demolition claws, hammers, rock saws and strong labourers. Our team is fully licenced with approved work cover insurances and aims to work in unison with clients, neighbours and the local council to minimize dust, noise, traffic disruptions and environmental impacts.

All brick and concrete is recycled for road base, good quality timber is typically sold to timber merchants, and non-saleable timber and green waste is reused for mulching.

DIG IT is a specialist demolition contractor, licenced to assess and remove asbestos and other hazardous materials from construction sites in Sydney and surrounding areas. We support you through every stage of the demolition process, including notifying WorkCover, requesting council approval and permits, locating and disconnecting underground utilities, developing safety and work plans and ensuring the site is left clean, tidy and safe for all employees, clients and the public.

Rock Sawing and Grinding

Our range of diamond-tipped rock saws, modern hammers and grinders can break down granite, sandstone, reinforced concrete and asphalt, so you can avoid delays to your project.

DIG IT rock saws manage detailed excavations with very little noise or vibration, making them ideal for excavation or demolition projects that are in close proximity to residents, workers, vehicles, hospitals and the local community. The precision of our machines means there is minimal damage to the property, while low noise levels mean you can continue excavation within DA-approved hours as required. Our rock saws are available in a range of diameters and will cut to a depth that suits your needs. Each of our rock saws offers modern safety features including reversible blade spin, rapid automatic blade brakes and adjustable shields. The saws can be mounted on excavators from 1.7 tonnes up to 24 tonnes.

DIG IT's range of hammers are a great solution for breaking through rock and concrete quickly and precisely. Our hammers are available to fit DIG IT skid steers, backhoes and excavators, with applications including; demolition of buildings, concrete slabs and foundations, construction projects, hard-rock bulk and detailed excavation.

DIG IT's range of hammers are a great solution for breaking through rock and concrete quickly and precisely. Our hammers are available to fit DIG IT skid steers, backhoes and excavators, with applications including; demolition of buildings, concrete slabs and foundations, construction projects, hard-rock bulk and detailed excavation.

DIG IT's range of rock grinders cut through challenging materials with ease and offers a naturally weathered appearance to freshly excavated rock. Our rock grinders are ideal for tight access where a saw or hammer can't be used, sensitive sites with very low vibration tolerance, digging service trenches and pits to achieve a uniform shape and depth, and cutting through hard rock with precision, to reduce machine time and over excavation, resulting in less backfilling or concrete.

Plant and Equipment Hire

DIG IT's ability to provide wet hire with a vast selection of plant and equipment, enables us to complete just about any earthmoving project.

We have dedicated and experienced crew ready to fulfil your requirements in a cost effective and efficient manner. Our trucks and machines are exceptionally reliable, which will ensure that the plant and equipment requested will arrive on site, on time and at the best price.

For Sydney locations we can quickly arrive on site to discuss your project and provide next day delivery of the required equipment. You will save on transport fees and have access to our team of experienced, qualified operators who understand the terrain in your local area.

Company Growth

Over the past several years, DIG IT has grown significantly. This is largely due to diversification into specialty works, offering both hire and contract of our services and the purchase of unique attachments.

Notwithstanding the difficulties of the global financial crisis in 2007-2008 and the economic challenges that followed on from the GFC, DIG IT has proven resilient in its market strategy. We are proud to have increased our workforce team, particularly through challenging and uncertain periods.

Our operation commenced as a three-man team in 2007, and today includes 31 members. In addition, our fleet has grown from several bobcats and a truck to now comprising eleven excavators, six trucks, three posi tracks, two skid steers and several specialty attachments.

We take the opportunity to reinvest profits back into our business, such as purchasing the latest plant equipment and furthering our technical capabilities.

Skill Development

We recognise that employees who are given effective training opportunities are more satisfied with their jobs. Our workforce is trained to the highest standards and we continue to invest to further develop our employees' capabilities. This includes Work Health and Safety (WHS), environmental awareness, and specific tuition to increase particular skill sets.

DIG IT ensures that all personnel have the necessary qualifications to comply with Work Cover regulations governing specialised activities such as working in confined spaces and plant operation.

Selected Clients

DIG IT highly values the quality of its commercial affiliations. These include such quality companies as:

Beebo Constructions | Lahey Constructions | Out N Up Constructions | Patterson Building Group | Trico Constructions | Agia Constructions | Bellearde Constructions C and E Critharis | Horizon Habitats | Pinnical Pools | Crystal Pools | Jarvis Constructions | Burmah Constructions | Pimas Gale Constructions | City Works Pty Ltd Artesian Pools | CWF Constructions | APD Building

Recent Projects

Demolition

Mermaid St, Maroubra

Client: APD Building

Description: Demolition of a two-story brick and fibro house, removal of trees and asbestos.

Value: \$55,000

Duration: 10 days

76 Wolesley Rd, Point Piper

Client: Bellearde Constructions

Description: Demolition of a four-story brick / concrete house. Barge and crane out waste from site and prep for excavation.

Value: \$190,000

Duration: 6 weeks

Cranbrook Rd, Bellevue Hill

Client: Horizon Habitats

Description: Internal strip out of three-story house, demolition of surrounding landscaping and pool.

Value: \$62,000

Duration: 20 days

O'Connor St, Chippendale

Client: Bellearde Constructions

Description: Demolition of a two-story and four-story brick and concrete factory buildings, removal of asbestos. Demolishing ground floor slabs and removal of an underground bomb shelter.

Value: \$320,000

Duration: 5 weeks

Excavation

Tilba Av, Balmain

Client: Trico Constructions

Description: Site remediation and removal of 500m³ of restricted and asbestos waste, capping off contamination and reinstatement. Bulk and detailed excavation in rock for commercial property & removal of 1100m³ of materials.

Value: \$800,000

Duration: 4 months

Seaview St, Cronulla

Client: Pinnacle Pools

Description: Preferred contractor for excavation of their numerous pools around the Sutherland Shire. Digging approximately 25 -30 pools each year.

Value: \$5,000 – \$15,000 each

Duration: 3 - 10 days

Vaucluse Rd, Vaucluse

Client: Beebo Constructions

Description: Bulk and detailed excavation of front yard and driveway, supplying of aggregates and soils, trenching for stormwater, and placement of plants, pond, and swimming pool.

Value: \$380,000

Duration: 9 months

Haran St., Mascot

Client: Trico Constructions

Description: Bulk excavation of three-story basement, removal of 4000m³ of sand. Dewatering site and subgrade preparation.

Value: \$350,000

Duration: 3 months

South Sydney Old Hospital, Green Square

Client: Lahey Constructions

Description: Remediation and removal of asbestos and GSW material. Removal of 300m³ of contaminated material. Rock-sawing sandstone for stormwater and foundations.

Value: \$110,000

Duration: 1 week

General Civil

O'Connor St, Chippendale

Client: Belvedere Constructions

Description: Principle contractor for site establishment, trade assistance for site retention and shoring, bulk and detailed excavation. Piling, wailer and anchors, removal of 7000m³ of sand and rock.

Value: \$1,700,000

Duration: 6 months

Gallimore Av, Balmain

Client: TPD Projects

Description: Head contractor and site establishment for demolition of three-story residential house, demolition of concrete swimming pool, detached pool house. Bulk and detailed excavation, 15m drop from ground level. Removal of approx. 1000m³ rock and soil.

Value: \$550,000

Duration: 4 months

Community

DIG IT is committed to supporting the local communities in which we work. On every project we work closely with our client and community stakeholders to minimise the impact of our works and ultimately, to help build better communities.

Personnel

The DIG IT team is currently 31 strong with 26 direct employees. This includes highly qualified managers and dedicated, skilled personnel.

Quality

All DIG IT employees conduct their work in a professional and efficient manner so that our clients receive the best service and value for money. We have earned our reputation in the highly competitive construction and demolition industry by delivering first class projects.

Work Health and Safety

DIG IT ensures that our services are provided in a safe manner by suitably trained personnel. To continually improve our safety procedures, policies and processes, DIG IT provides training and induction to all of our employees as well as regular internal reviews.

Furthermore, DIG IT only provides plant and equipment that is safe and properly maintained. Upon request we can provide all Work Cover Licences which are all part of our WHS System that ensures all requirements of the WHS Regulation 2001 are applied.

Providing a safe and healthy work environment for all employees and sub-contractors is one of our primary priorities.

Environment

DIG IT has a proven Environmental Management System (EMS) to ensure all our work practices minimise, as much as possible, any negative effects on the environment. The system takes an integrated approach, ensuring we have multiple methods and tools at our disposal.

We continually assess and monitor our environmental processes to enable improvement, ranging from erosion and sedimentation control methods to habitat protection. Practices are analysed and adapted to meet site-specific parameters, ensuring that we deliver the best possible solution.

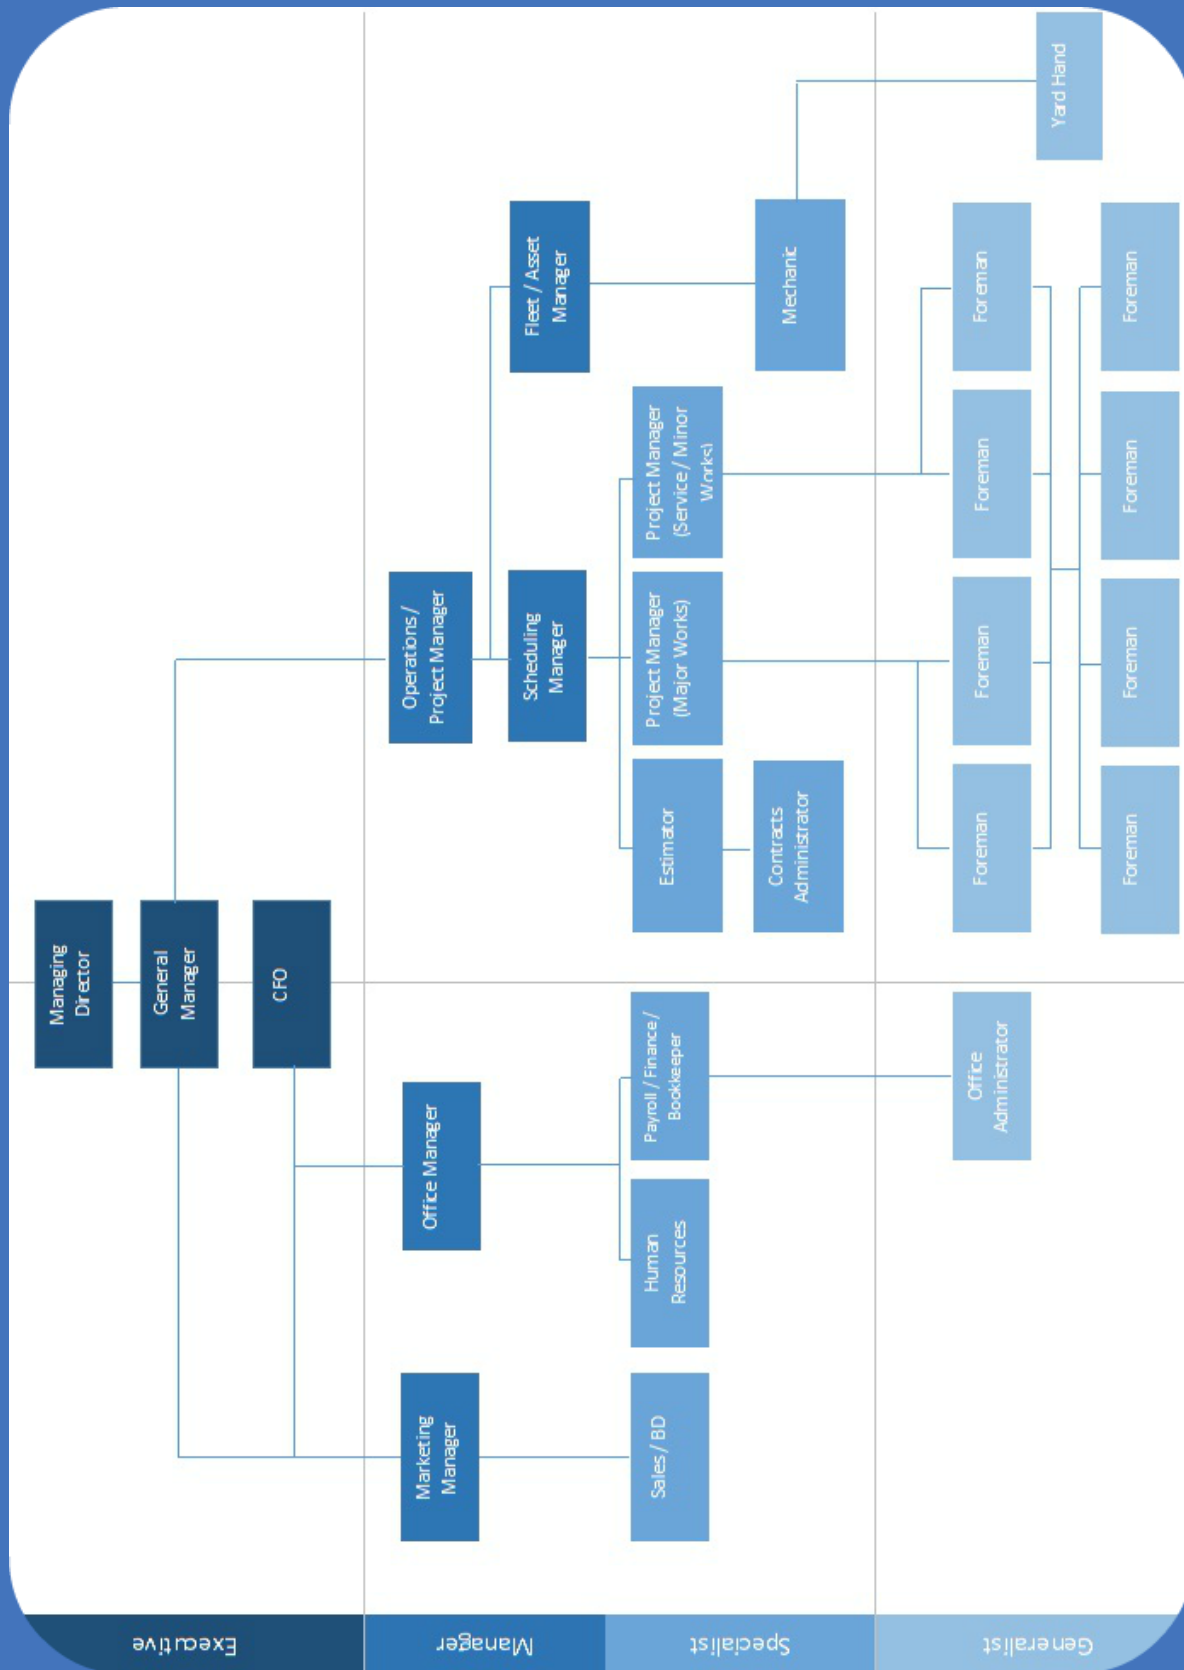

Integrated Management System

DIG IT's integrated management system allows us to integrate and organise all of the company's systems and processes in to one complete framework. This enables DIG IT to operate as a single unit with unified objectives. It covers all aspects of our operations, and it is designed to help us meet our quality, safety and environmental goals as well as our legal obligations.
